

Guide to Change Image

Adobe Photoshop

- Open the PSD file in Adobe Photoshop.
- Locate the image layer (labeled in blue).
- Double-click on the Smart Object thumbnail (not the layer name).
- A new window will open. In this window, drag and drop your own image into this new window.
- Press Ctrl + S (Windows) or Cmd + S (Mac) to save the smart object.
- Close the smart object window. Your image will now appear in the main file.
